## INTRODUCTION.

*To the Chairman and Members  
of the Education Committee.*

Madam Chairman, Ladies and Gentlemen.

I have the honour to present my Annual Report on the Schools Health Service dealing with the work done during the year 1954.

An additional Medical Officer was appointed to commence work at the beginning of the Autumn Term. As the appointee was anxious to attend a part-time course for the Diploma of Public Health, leave of absence was granted for the days taken up by the course during the University Term and a General Practitioner was appointed to work part-time for an equivalent period.

As yet it has not been possible to appoint Dental Surgeons to fill the four additional posts on the establishment. It will be noted that, notwithstanding the existence of certain areas where it was only possible to perform emergency dental work, the numbers of fillings again exceeded the number of extractions. Orthodontic work is done by those Dental Surgeons who have a particular skill and keenness for this branch of dentistry; they treat school children from neighbouring areas as well as those resident in their own "dental district". As in previous years expectant and nursing mothers and children under the age of five were encouraged to attend the County Dental Clinics, and immediate appointments are made for these priority classes of patient.

Additional Dental Clinics have been established at Ellesmere Port, Little Sutton and Weaverham and other clinics opened in County Clinic Centres at Cheadle and Hoylake in accordance with the County Council's policy of concentrating all clinical activities in the same building whether under the Health or the Education Committee's activities.

An additional Speech Therapist has been appointed for work primarily in the Macclesfield area. Consequent upon this appointment it will also be possible to provide speech therapy at Stockton Heath, from which area pupils requiring speech therapy now have to make the difficult journey to Runcorn for treatment.

This report includes a section contributed by the Senior School Medical Officer, dealing with his work amongst school children

who show various psychological difficulties. Pupils are sent to Child Guidance Clinics at Manchester, Salford and Liverpool, but those are insufficient to meet the needs of the County. A system has therefore been evolved through the Senior School Medical Officer which is working most satisfactorily and which has the advantage of bringing the child, the medical officer, the teacher and the parents together.

The Senior School Medical Officer visits the homes of many children in this connexion, and follow-up visits are made by Health Visitors, whilst the Area School Medical Officer keeps such pupils under supervision. In this way readjustment can often be effected without unduly differentiating the child from his schoolfellows and all persons concerned with investigation and treatment are working with the home and educational background pertaining to the normal child.

The means of early diagnosis and treatment of spasticity have been carefully considered by the Special Services Sub-Committee, who have decided to appoint, jointly with the County Health Committee, as an experimental measure, a physiotherapist and an occupational therapist, both of whom will have special training and experience with spastic children. These two persons will in the first place give special attention to the training of Health Visitors in the detection of spasticity in the early months of life and will give the necessary treatment at the County Clinic Centres. The Projected Unit for Spastic children at Clatterbridge Hospital has, not, as yet, been commenced.

Selected Health Visitors have attended the Department of Education of the Deaf at Manchester University for tuition in the early recognition of deafness. There is a need for additional Health Visitors consequent upon the many new duties laid upon them in other branches of their work.

With the ready co-operation of the Director of Education and the Teaching Staffs, B.C.G. Vaccination of School leavers commenced throughout the county in the Autumn Term of 1954. The response of parents to the offer of vaccination was most gratifying, and by the end of the year, 2,156 pupils had been tested and of these 663 (30.75%) were found to react positively to tuberculosis. These reactors were followed up by the School Medical Officers. Unfortunately it has not been possible to arrange for them to be examined by Miniature Radiography, as these units visit the administrative county only infrequently; 3 County Districts were in fact visited in 1954.

The number of medical inspections in 1954 shows an increase of approximately 4,500, or 10% over the previous year. Those children

found to have defective vision were increased in number but the total number of other defects found showed a slight decline. It is desired to draw attention to the decreasing percentage of pupils found on inspection to be in poor general condition, and to the 10% drop in the number of individual pupils found to be infested with vermin.

It is with great regret that I have to record the death of Mr. H. Foulkes, one of the School Dental Surgeons.

I acknowledge with gratitude the help and co-operation which I have invariably received from the members of the Education Committee, the Director of Education, the County Architect, the Teaching Staff at the schools, and all the staff of the Schools Health Service.

I beg to remain,

Your obedient servant,

ARNOLD BROWN,

*Principal School Medical Officer.*

June, 1955.

## General Statistics

The Administrative County of Cheshire comprised 42 County Districts, namely 9 Municipal Boroughs, 23 Urban Districts and 10 Rural Districts, at the end of 1954, Hoole U.D. being transferred to Chester City on 1/4/54.

The population estimated by the Registrar-General at mid-1954 was 831,400.

The total number of Schools in the educational area at 31/12/54 with their enrolments, was as follows:—

Primary	.....	.....	.....	.....	463	82,300
Secondary (Grammar)	.....	.....	.....	.....	18	10,420
Secondary (Modern)	.....	.....	.....	.....	61	20,063

At the end of 1954, there were 88,117 children receiving school milk, and 54,940 receiving school meals.

No schools were closed by the Principal School Medical Officer in 1954 or in 1953 on account of infectious disease.

## The School Dental Service in 1954.

Mr. H. R. Parry, Principal School Dental Officer reports:—

Staff equivalent to 21 full time Dental Officers.

The normal routine dental inspection and treatment of school children has been carried in all but three areas in the county during the year.

In each of these three areas a dental officer has been in attendance for at least one whole day per week for the purpose of carrying out emergency treatment.

In the remaining areas approximately 70% have been treated each 12 to 15 months and the other 30% each 15 to 20 months.

In October, 1954, the Dental Staff reached its full establishment of 24 officers (2 part time and 23 full time). The establishment was raised subsequently from 24 to 28.

Of the 82,000 children inspected, 49,500 were found to require treatment, 48,000 were referred for treatment and 35,600 or 74% were actually treated. 42,500 extractions (including 6,300 permanent teeth) and 42,700 fillings (including 5,500 temporary teeth) were completed.

The work carried out during the year is very satisfactory in both quality and quantity; with one additional Dental Officer, 4,000 more teeth were extracted than in 1953, otherwise the number of fillings and other operations was approximately the same.

More fillings were completed than extractions, in spite of the large number of children treated in the emergency areas, where 95% of the work was extractions only.

Of 7,000 appointments made for children to attend for treatment during the holidays 65% were kept, of which 80 to 90% attended for the first 10 days and roughly 5 to 10% for the third and fourth weeks.

400 children made nearly 2,000 visits for orthodontic treatment (regulating of teeth) and 200 cases were completed during the year.

Four Dental Clinics were opened, one each at Ellesmere Port, Weaverham, Cheadle and Little Sutton, making a total of 36 fully electrically equipped Dental Clinics in the County; ten years ago, in 1944, we had only one fully equipped clinic.

Our sincere thanks and appreciation are due to members of the Education Committee and the Director of Education.

Once again we should like to thank all the head teachers for their generous support, which is always forthcoming and without which our School Dental Service would suffer considerably.

### **School Buildings**

The following major works were completed or in progress during 1954. In addition to these works a large number of minor works of alterations, additions and improvements were carried out as well as the normal maintenance work to schools throughout the County:

#### *New Schools completed and occupied.*

Altrincham Broomwood Estate County Primary School.

Crewe Wistaston Green Primary School.

Ellesmere Port Pooltown Road County Primary School.

Little Sutton Secondary School.

Little Sutton Parklands Primary School.

Middlewich Primary School.

*Extensions to existing Schools completed.*

Runcorn The Grange County Primary School.  
Timperley Heyes Lane County Primary School.  
Winsford Verdin Grammar School.  
Sale Springfield Road County Primary School—  
Conversion (Stage 1).  
Poynton Primary School—Additional Classrooms.  
Middlewich Secondary School—Housecraft Room.  
Congleton Girls Secondary School—Additional Classroom.

*New Schools in course of erection.*

Alsager Secondary School.  
Cheadle Grammar School.  
Cheadle Ladybridge County Primary School.  
Dukinfield Grammar School.  
Hartford Secondary School.  
Hazel Grove Secondary School.  
Weaverham Secondary School.

*Extensions in progress.*

Gatley Hawthorn Road Primary School.  
Sale Springfield Road County Primary School—  
Conversion (Stage II).

## **SPECIAL SERVICES REPORTS.**

### **Ear, Nose and Throat Service**

*(from Mr. E. Innes).*

The E.N.T. Unit has continued to provide valuable help to the School Health Service.

The waiting time for removal of tonsils and adenoids has, on the whole continued to decrease, though occurrences such as the present stoppage of operating lists at the Macclesfield Infirmary due to shortage of staff, have an adverse effect in this respect.

Efforts are being made to reduce the large number of urgent cases on the waiting list from the Dukinfield, Hyde and Stalybridge areas, which has accrued due to the long waiting time at the Ashton Hospital.

The number of chronic discharging ears has continued to decrease. This is due partly to the energetic and regular treatment which can be given at the School Clinics and partly because running ears are now usually seen at the acute stage and prevented from becoming chronic.

Quite a few cases have been referred by the Speech Therapists. Any of these cases which can be helped by E.N.T. treatment have been given priority consideration.

Full use has been taken of the facilities offered by Professor Ewing's Department of Education of the Deaf, at Manchester University. His specialised apparatus has been invaluable in deciding in some cases whether a child who is partially deaf should continue to attend an ordinary school or be referred to a special school.

Ophthalmic Service

*(from Dr. A. Holmes-Smith).*

The School Ophthalmic Clinics have progressed satisfactorily during the year 1954. The linking of clinics with hospitals through the Ophthalmic Service is now showing the full fruits of your Committee's fore-thought; not only is it possible for patients requiring hospital treatment for investigations to be admitted urgently, if required but they can be seen as out-patients without the extensive travel which was sometimes necessary in the past, and this is, of course, a great boon when one is dealing with children of whom there may be several in a family. The arrangements for orthoptic treatment in the County are also satisfactory. Furthermore the waiting time for operation for squint, the most common form of operation in children, is now, for the most part, of comparatively short duration, and there is no reason for any child who requires operation to leave school without the operation being performed.

In the wider spheres of medicine the year has seen the solution of the mystery of the cause of retrolental fibroplasia, a condition which during the past decade, has been increasingly frequent in the low-weight premature infant and would, therefore, have been reflected at this stage in the education both of partially sighted and blind infants. It has been shown that the condition arises from the sudden withdrawal of a high concentration of oxygen and it is, therefore, exceedingly easy to prevent the condition arising, whereas it had appeared to be a problem which would increase steadily in size owing to the increasing number of premature infants reared.

In my last report I made a comment on the demand of employers for a medical examination of all new employees, including an eyesight test on which an applicant for employment may be rejected on account of defective vision; it is evident now that there is a similar concern for all applicants for motor driving licences, yet another reason for the early detection of visual defects.

Certain new School Clinics have been opened during the year; these now include, as routine, the special equipment required for ophthalmic examination and are indeed exceedingly pleasant to work in.

In conclusion may I acknowledge once more the valuable assistance of the Health Visitors attached to the Clinics.

## Paediatric Service

*(from Dr. J. D. Allan).*

The County Paediatric Service has been continued on the basis of three clinics per month, that is, two in Crewe and one in Northwich, plus one ward round of the School Medical Officers. The latter alternates between Stockport and Macclesfield and is well attended and appreciated by the School Medical Officers. It also has the advantage of promoting liaison between the Hospital and School Medical Service and quite often valuable discussion on various subjects ensues, or matters affecting individual cases are clarified.

The clinics in Crewe and Northwich are well attended and the General Practitioners in both places make good use of the service provided. Recently a paper on the subject of "Modern Trends in Paediatrics" was given to the General Practitioners in Northwich.

Cases requiring hospital admission are generally accommodated with very little delay at Macclesfield, but the provision made, as yet, for dealing with (1) the spastic child (2) the education of the sub-normal child and (3) the psychologically unstable child, though improved, are not ideal.

The local hospitals both in Crewe and Northwich co-operate fully in ancillary investigations necessary following consultation and, as a result of this, there has been less need for transport, for such investigations, to Macclesfield, thus relieving in some slight way the present strain on the Ambulance Service.

### ATTENDANCES AT PAEDIATRIC CLINICS, 1954.

Crewe, Ludford Street .....	48	Hyde, Parsonage Street.....	7
Crewe, Stalbridge Road .....	53	Northwich, Darland House	41

## Orthopaedic Service

Since 5th July, 1948, the orthopaedic service has been the financial responsibility of Regional Hospital Boards under the National Health Service Act. The County Council has been able to arrange for the existing clinics—the longest established of the specialist services—to continue unaltered, the specialist surgeons and the physiotherapists attending as before. The methods of ascertainment remain the same, children being referred to the surgeons by private doctors, or (with the approval of the private doctor) by School Medical Officers after medical inspection at schools or minor ailment clinics.

## ATTENDANCES AT ORTHOPAEDIC CLINICS, 1954

Dukinfield	1920	Runcorn	748
Ellesmere Port	916	Sale	173
Hyde	1006	Stalybridge	1262
New Ferry	650	Stockton Heath	73
Northwich	212		

Children attending for sunlight treatment are the responsibility of the local authority unless referred for it by the specialist. The following were the attendances during 1954 by school children at the clinics specified:—

Dukinfield	1666
Hyde	1583
New Ferry	1421
Sale	763
Stalybridge	1194

### Psychiatric Service.

*(from Dr. H. Craig).*

Since it has not been possible to deal with all Cheshire pupils requiring Psychiatric investigation and treatment at the existing Child Guidance Clinics at Liverpool, Salford and Manchester, a Psychiatric Service has been evolved in the County over the last six years, which, starting as a mere "screening" device, has developed into the main means of providing Psychiatric help.

Its success is shown by the requests for advice and treatment received on behalf of pupils from parents, doctors, hospitals and head teachers. During 1954 the service has been extended to cover the investigations of boys in the Remand Home at the request of the Juvenile Courts.

The cases presented were behaviour problems (truancy, stealing, difficult behaviour) psychosomatic (enuresis, asthma) educational problems, (backwardness, school difficulties, word blindness, specific abilities); personality disorders (fears, nervousness, sex difficulties, aggression, cruelty); and miscellaneous difficulties such as speech disorders and suitability for adoption. There was a preponderance of cases in the Secondary School age group.

The aim of the scheme is to enable the psychologically disturbed child to remain in the normal category, to help him to work out his

difficulties in the ordinary home and school environment and to function as a preventive Mental Health Service.

Treatment includes psychotherapy with or without play, supervision of the home background, and educational treatment with the co-operation of the teaching staffs.

At present 72 children are undergoing treatment but there are 23 children on the waiting list for investigation. As regards results, of 73 pupils already treated, 25 have made marked improvement and 36 have improved, 7 have not improved and 5 have been found educationally subnormal and are being educated at the residential Special School.

Such results could not be achieved without the interest and co-operation shown by the teaching staff and the staff of the Schools Health Services and my grateful thanks are due to them.

The cases examined included:—

- (1) Behaviour problems:—truancy, 12, stealing, 14, difficult behaviour, 11.
- (2) Psychosomatic:—enuresis, 7, asthma, 3.
- (3) Educational:—backwardness, 10, school difficulties, 10, suitability, for grammar school or boarding school education, 10, word blindness, 2, specific abilities, 2.
- (4) Personality Disorders:—fears and nervousness, 7, sex difficulties, 5, aggression and cruelty, 3, others, 8.
- (5) Others:—adoption, 2, speech difficulties, 2.

## Torpenhow Open-Air School

The school is situated on the hill at Frankby overlooking the estuary of the River Dee.

There is accommodation for 78 pupils suffering from malnutrition, general debility and chest conditions such as asthma, bronchitis, and bronchiectasis. In addition, children who are contacts of cases of open pulmonary tuberculosis are segregated from the source of infection by being admitted to the school. School children of both sexes within the age range of 7-11 years are admitted.

Children suitable for admission are selected by the School Medical Officers at medical inspections and enter Torpenhow Open-Air School initially for a period of six months, this being renewed if found to be necessary. Pupils remain at Torpenhow throughout the year, with the exception of the month of August, and attend the school during the normal school term. During the school holidays a number of recreational activities such as walks, picnics, games and visits to places of interest are organised.

During the year 139 children were admitted and 138 were discharged. They were classified according to their various disabilities as follows:—

	<i>Admissions</i>		<i>Discharges</i>	
	<i>Boys</i>	<i>Girls</i>	<i>Boys</i>	<i>Girls</i>
General Debility	38	40	41	43
Asthma	14	6	17	6
Bronchitis	18	4	12	5
Bronchiectasis	5	4	3	3
Tuberculosis contacts	1	5	1	2
Eczema and Asthma	2	2	3	2
	78	61	77	61

## Mary Dendy School

At this school 102 places are provided for educationally subnormal children, generally speaking within the I.Q. range of 55-75. Children accommodated in three boarding houses, two for boys and one for girls, and attend daily for lessons at the special school.

Children requiring admission are selected by the School Medical Officers at medical inspections. They can be admitted at any time during school life, but are rarely suitable before the age of seven years. Children usually remain at the school until the age of sixteen years, the normal school leaving age for handicapped pupils. All cases are reviewed from time to time, those found to be ineducable are excluded, some are re-admitted to ordinary school.

The Mary Dendy School can, of course, take only a small proportion of the educationally subnormal children in the County, and therefore priority of admission is given to those, who are either suffering from the effects of adverse home conditions, deprived of a normal home life, or are actual or potential delinquents.

The greatest problem encountered at this school is to make suitable arrangements for children after leaving. The very reasons mentioned above for admission invariably constitute good cause for further close supervision after leaving school—often preferably in an institution. The shortage of accommodation in such institutions has often necessitated educationally subnormal children being returned to unsuitable homes at a time in their lives when they are particularly prone to emotional instability. The Regional Hospital Boards, which are responsible for providing institutional accommodation for mentally defective persons, are aware of these difficulties and are making every effort to remedy the deficiencies.

During the year under review the numbers admitted to and discharged from the school were:—

					<i>Boys</i>	<i>Girls</i>	<i>Total</i>
On Roll 31.12.53	—	.....	.....	.....	66	34	100

# MEDICAL INSPECTION RETURNS

Year ended 31st December, 1954

TABLE I

## Medical Inspection of Pupils attending Maintained Primary and Secondary Schools

### A.—PERIODIC MEDICAL INSPECTIONS

Number of Inspections in the prescribed Groups—							
Entrants	—	—	—	—	—	—	13047
Second Age Group	—	—	—	—	—	—	9797
Third Age Group	—	—	—	—	—	—	8518
							<hr/>
					Total	—	31362
Number of other Periodic Inspections	—	—	—	—	—	—	110
							<hr/>
					Grand Total	—	31472
							<hr/>

### B.—OTHER INSPECTIONS

Number of Special Inspections	—	—	—	—	6174
Number of Re-Inspections	—	—	—	—	11322
					<hr/>
			Total	—	17496
					<hr/>
Number of Children Examined for Visual Acuity	—	—	—	—	12726

### C.—PUPILS FOUND TO REQUIRE TREATMENT

Number of Individual Pupils found at Periodic Medical Inspection to require Treatment (excluding Dental Diseases and Infestation with Vermin)

Group	For defective vision (excluding squint)	For any of the other conditions recorded in Table IIA	Total individual pupils
(1)	(2)	(3)	(4)
Entrants —	165	2150	2313
Second Age Group —	657	1105	1717
Third Age Group —	672	704	1324
Total (prescribed groups) —	1494	3959	5354
Other Periodic Inspections—	3	9	11
Grand Total —	1497	3968	5365

TABLE II

A.—RETURN OF DEFECTS FOUND BY MEDICAL INSPECTION  
IN THE YEAR ENDED 31st DECEMBER, 1954

Defect Code No.	Defect or Disease	Periodic Inspections		Special Inspections	
		No. of Defects		No. of Defects	
		Requiring treatment	Requiring to be kept under ob- servation but not requiring treatment	Requiring treatment	Requiring to be kept under ob- servation, but not requiring treatment
	(1)	(2)	(3)	(4)	(5)
4	Skin — — — — —	431	306	86	49
5	Eyes—				
	(a) Vision — — — — —	1497	998	697	396
	(b) Squint — — — — —	308	218	78	40
	(c) Other — — — — —	214	72	34	14
6	Ears—				
	(a) Hearing — — — — —	122	203	24	53
	(b) Otitis Media — — — — —	72	98	13	16
	(c) Other — — — — —	68	38	14	7
7	Nose or Throat — — — — —	1349	2574	241	365
8	Speech — — — — —	200	202	58	66
9	Cervical Glands — — — — —	22	1075	15	146
10	Heart and Circulation — — — — —	121	388	37	100
11	Lungs — — — — —	243	595	60	158
12	Developmental—				
	(a) Hernia — — — — —	26	51	11	8
	(b) Other — — — — —	51	173	15	29
13	Orthopaedic—				
	(a) Posture — — — — —	253	356	59	51
	(b) Flat Foot — — — — —	331	437	65	66
	(c) Other — — — — —	273	383	67	60
14	Nervous System—				
	(a) Epilepsy — — — — —	24	33	11	13
	(b) Other — — — — —	45	70	10	10
15	Psychological—				
	(a) Development — — — — —	104	220	10	184
	(b) Stability — — — — —	36	110	16	50
16	Other— — — — —	418	230	103	84

**B.—CLASSIFICATION OF THE GENERAL CONDITION OF  
PUPILS INSPECTED DURING THE YEAR IN AGE GROUPS**

Age Groups	No. of Pupils Inspected	A (Good)		B (Fair)		C (Poor)	
		No.	% of col. 2	No.	% of col. 2	No.	% of col. 2
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Entrants .....	13047	5290	40	7264	56	493	4
Second Age Group	9797	4570	47	4852	49	375	4
Third Age Group	8518	4332	51	3997	47	189	2
Other Periodic Inspections	110	99	90	11	10	—	—
<b>Total</b>	<b>31472</b>	<b>14291</b>	<b>46</b>	<b>16124</b>	<b>51</b>	<b>1057</b>	<b>3</b>

**TABLE III**  
**Infestation with Vermin**

(i) Total number of examinations in the schools by the school nurses or other authorized persons — —	329957
(ii) Total number of <i>individual</i> pupils found to be infested	4697
(iii) Number of individual pupils in respect of whom cleansing notices were issued (Section 54 (2), Education Act, 1944) — — — — —	1366
(iv) Number of individual pupils in respect of whom cleansing orders were issued (Section 54 (3), Education Act, 1944) — — — — —	128

TABLE IV.

Treatment of Pupils attending Maintained  
Primary and Secondary Schools.

GROUP I.—DISEASES OF THE SKIN (excluding uncleanness, for which  
see Table III).

	Number of cases treated or under treatment during the year.			
Ringworm— (i) Scalp	—	—	—	8
(ii) Body	—	—	—	16
Scabies	—	—	—	18
Impetigo	—	—	—	1057
Other skin diseases	—	—	—	1430
Total	—	—	—	2529

GROUP II.—EYE DISEASES, DEFECTIVE VISION AND SQUINT.

	Number of cases dealt with			
External and other, excluding errors of refraction and squint	—	—	—	1531
Errors of Refraction (including squint)	—	—	—	6680
Total	—	—	—	8211
Number of pupils for whom spectacles were				
(a) Prescribed	—	—	—	2987
(b) Obtained	—	—	—	2733

GROUP III.—DISEASES AND DEFECTS OF EAR, NOSE AND  
THROAT.

	Number of cases treated			
Received operative treatment				
(a) for diseases of the ear	—	—	—	7
(b) for adenoids and chronic tonsillitis	—	—	—	467
(c) for other nose and throat conditions	—	—	—	25
Received other forms of treatment	—	—	—	1320
Total	—	—	—	1819

GROUP IV.—ORTHOPAEDIC AND POSTURAL DEFECTS.

(a) No. treated as in-patients in hospitals	—	184
(b) No. treated otherwise, e.g., in clinics or cut-patient departments	—	1496

GROUP V.—CHILD GUIDANCE TREATMENT.

No. of pupils treated at Child Guidance Clinics	—	14
---	---	----

## GROUP VI—SPEECH THERAPY

Total number of sessions at Clinics	519
No. of pupils referred for Speech Therapy	276
No. of pupils treated	368
Total attendances at Clinics	8347
No. of visits to Schools	317
No. of children examined at Schools	543
No. of visits to the homes of pupils	301

## GROUP VII—OTHER TREATMENT GIVEN.

Miscellaneous Minor Ailments	15768
------------------------------	-------

### TABLE V

#### Dental Inspection and Treatment

(1) Number of pupils inspected by the Authority's Dental Officers—			
(a) Periodic Age groups			72855
(b) Specials			9149
(c) TOTAL (Periodic and Specials)			82004
<hr/>			
(2) Number found to require treatment			49446
(3) Number referred for treatment			48050
(4) Number actually treated			35623
(5) Attendances made by pupils for treatment			54215
(6) Half-days devoted to :	(a) Inspection		775
	(b) Treatment		8091
	Total (a) and (b)		8866
<hr/>			
(7) Fillings	Permanent Teeth		37199
	Temporary Teeth		5477
	Total		42676
<hr/>			
(8) Number of teeth filled :	Permanent Teeth		30976
	Temporary Teeth		4127
	Total		35103
<hr/>			
(9) Extractions :	Permanent Teeth		8372
	Temporary Teeth		34129
	Total		42501
<hr/>			
10) Administration of general anaesthetics for extraction			9172
<hr/>			
11) Other Operations :	(a) Permanent Teeth		5143
	(b) Temporary Teeth		1508
	Total (a) and (b)		6651

**TABLE VI**  
**Number of handicapped pupils examined in School**

Defect	Number of	
	New Cases	Re-exams
Blind	1	.....
Partially Sighted	7	31
Deaf	2	7
Partially Deaf	3	7
